BELL (INDOOR UNIT)
INCLUDED

From the standard doorbell to the interphone, from video interphone to the "Smart doorbell"...

Hello is revolutionizing the doorbell concept, providing the possibility to watch, answer and talk to the people that is ringing your doorbell, even if You are not at home, directly from your smartphone. Replace your old doorbell with HELLO, connect it to the internet (WiFi or through the Ethernet cable) and You'll answer through the doorbell directly from your smartphone or from your tablet wherever You are. Once a visitor rings to the door, Hello generates a videocall to your mobile device, and You could, wherever You are, watch, listen and answer talking to the people at your door house. Hello is waterproof, has a built-in infrared camera designed also for the night vision, provides you the possibility to open directly the gate or the door using the App and it is easy to install.
