The range of the 22" model that combines the universe of apps and on-demand services with free and pay terrestrial and satellite content in 10-bit DVB-T2 / S2 HEVC technology. After installing the TV and connecting to the internet through a few simple guided steps, you can access preloaded apps such as Netflix, DAZN, YouTube ... or download hundreds of applications, available on the dedicated Android App Store, to range between information content, social media and video on demand services or browse the web with the integrated browser.

The App Store is optimized for remote navigation, but if you are looking for an even easier user experience, just download the EShare app for free on your smartphone to transform it

streaming content.

Smartphone and TV, a single screen! With the mirroring function you can share the contents of your mobile device on the TV screen: photos, movies, music, games and more.
