CONNECTING ON OTHER DEVICE

ShootingPlus V3 App ,For more details, please pay attention to the WeChat public account

Instruction to connect to PC device / smart TV / TV box / PS3 :
1. Plug the 2.4G wireless receiver into the USB interface of the PC device/smart TV/TV box;
2. When in OFF mode , pressing the L1 key + HOME key together, the controller enters the wireless
   pairing mode. At this time, the LED1 and LED2 indicators flash rapidly;
3. When connected, the LED1 and LED2 indicators will stay ON;
4, you can play games downloaded from the PC device / smart TV / TV box / PS3

Turbo function:
1. Turbo function setting: first press and hold the function key to be accelerated, for example: A key,
   then press and hold Turbo key, then A key has acceleration continuous function;
2. Turbo function cancel: first press and hold the function key that has been set to accelerate, such as A key,
   then press and hold the Clear key. At this time, the acceleration interlock function of A key is canceled.

Wired USB mode operation and precautions:
1. With the cotroller off,hold the R1 key and insert the USB cable, it will automatically recognize the device
   (PC/PS3/SWITCH);
2. The LED in the corresponding mode flashes quickly after the USB is inserted,
   and the LED in the corresponding mode is always on after the USB recognition is successful;
3. In PS3 and SWITCH host mode, the indicator light after USB recognition is successful will be automatically
   assigned according to the channel issued by the host
   (1,2,3,4 channels correspond to LED1, LED2, LED3, LED4)

Controller charging / sleep / wake up function:
1. When the controller is in the off state (press the HOME button to turn on/off), the LED4 indicator flashes
   slowly and is always on after charging. When charging in the Bluetooth connection state, the LED4 indicator
   light flashes slowly, and it lights up after being fully charged.
2. Sleep/Wake-up function: The gamepad will go to sleep if it is not used within 5 minutes. When you need to
   use it again, you need to press HOME button to wake up and you can connect back;
3. When the battery is low, the LED4 indicator flashes quickly.

TECHNICAL FEATURE

Electrical parameters:

1. Working voltage: DC3.7V
2. working current: 8mA
3. Working time: 20H
4. Sleeping mode current: <10uA

5. Charging voltage/current: DC5V/500mA
6. Bluetooth transmission distance: <= 8M
7. Battery capacity: 380mAh
8,.standby time: full power placed for 30 days

Precautions:

1. Please do not store this product in a humid or hot place;
2. Do not knock, beat, hit, pierce, or attempt to disassemble the product to avoid unnecessary damage to the product;
3, the product built-in battery, do not discard with the garbage;
4. Do not charge the handle near fire or other heat sources;
5. Non-professionals should not disassemble this product, otherwise it will not be included in the after-sales warranty service.

Common problem:

Q: Can't I find the handle when I open the phone?
A: Undo the Bluetooth pairing device name before the handle and the phone, and turn on the phone Bluetooth search pair again.

Q: Why doesn't the new handle turn on?
A: The new handle is generally low in power. Please use the USB cable inside the box to connect the 5V charger to charge the handle.
   After fully charging, press the power button to turn it on.
